

LED VAPOUR PROOF FIXTURE 4FT BOLMX486E

DESCRIPTION

Designed as a safe, powerful and energy efficient replacement for traditional fluorescent strip lights in harsh environments such as car wash operations, tunnels, parking garages, warehouses and maintenance areas, Blue Ocean's BOLMX486E LED Vapour Proof Fixture is engineered with superior LED chips, high-efficiency driver, and thermal and lumen balanced engines, to produce high lumen output and superior quality light with excellent thermal control. Constructed with durable polycarbonate body and securely sealed by 8 closure clips, the luminaire is IP65 rated to be resistant from water injection, contaminants and insects. LM-80 rated LEDs with high-ranked binning ensures buzz and flicker free light, colour uniformity, and minimized lumen droop, while the UV stabilized polycarbonate diffusers integrated with crystals further assists even light distribution. Flexible installation allows wall, ceiling or suspended mounting with stainless steel mounting hardware. Three electrical options are available: dimming, emergency fitting and sensors.

SPECIFICATION CHART

Model	BOLMX486E
Voltage	100-277VAC
Wattage	40 60W
Replacement	120W T8
Lumen Output	5200lm 7800lm
CRI	>80
PFC	0.95
CCT	4000K 5000K
Dimensions	50.8"X6.8"X3.9"
Operating Temp.	-30~40°C
Housing	Off-white Polycarbonate
Diffuser	Opal Polycarbonate
Installation	Suspending Surface Mount

ORDERING INFORMATION

Seris No.
BOLMX486E

Lens
LM=Milky
