

## LED Strip Light Accessory RGB Amplifier

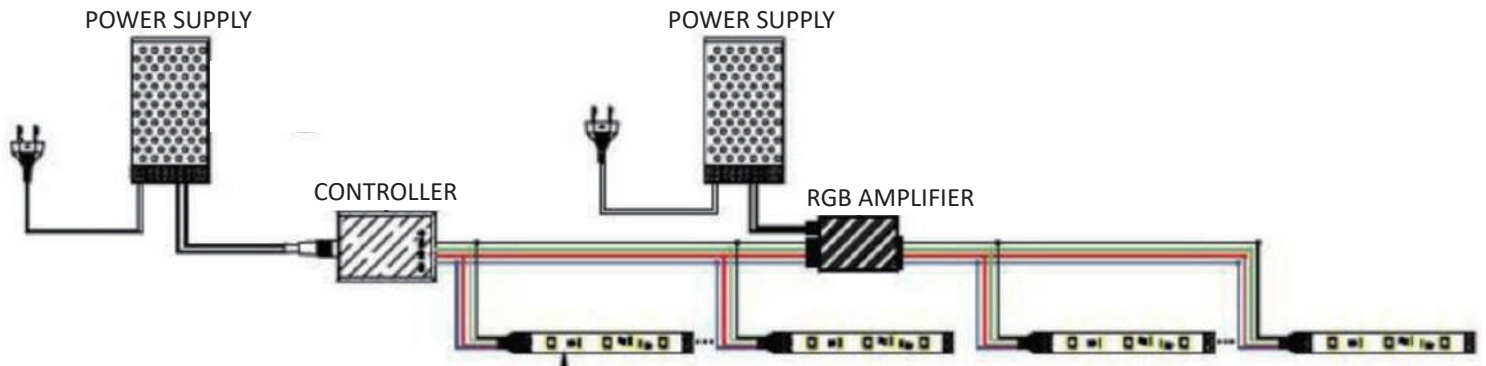

### FEATURES

- Increase load capacity of entire circuit and extends the signal of controllers
- 3 channel output for RGB strip, maximum 4 Amps per channel and 12 Amps in total
- Accept PWM signal, amplify RGBW signals using PWM technology
- Super heavy output 288W with 0-12W static power consumption

### SPECIFICATIONS

- Working Temp: -20°C-60°C
- Power Input: DC12V-DC24V
- Output: 3 circuit
- Connection Mode: common mode
- Dimensions: L113xW65xH24(mm)
- Weight (N.W.): 98g
- Static Power Consumption: <1W
- Output Current: <4A per channel
- Output Power: 12V<144W, 24V<288W
